

CUSTOMER SUCCESS STORY

Cabinet Chamber of Namibia

High-tech audio for a heritage building: TeamConnect Ceiling 2 ensures great speech intelligibility in Namibia’s Office of the Prime Minister

Challenge

In the Cabinet Chamber of Namibia’s Office of the Prime Minister, the installation of ceiling microphones was challenging for the upper gallery of the two-level room as the boundary microphones of the lower floor created interference. As Gadgets Namibia Solutions had to install the ceiling microphones in a heritage building, they were limited regarding modification and civil works as they were requested to preserve the heritage of the room by incorporating AV technology.

Solution

In cooperation with Stage Audio Works Namibia and Sennheiser South Africa, Gadgets Namibia Solutions decided on suspended mounting of two units of TeamConnect Ceiling 2 for the upper level of the Cabinet Chamber.

“We were working in a listed building with a very clear brief to preserve the historic interior finishes, so we had to find clever ways to install our equipment to ensure that it blended in with the minimum amount of disruption to the surroundings.”

Joppie Maritz, Stage Audio Works Namibia

[FACTSHEET](#)

Products installed	2 units of TeamConnect Ceiling 2
Country	Namibia
Region	EMEA
Industry	Government
Integrator	Gadgets Namibia Solutions & Stage Audio Works Namibia
Profile	Gadgets Namibia Solutions is a 100% Namibian owned, leading innovative ICT products and service provider, founded in 2010.
