

CUSTOMER SUCCESS STORY

ATR Eastern Support

ATR adopts ceiling microphone solution to support Activity Based Working concept in Singapore office

Challenge

During the COVID-19 pandemic when hybrid work arrangements were introduced, staff of the ATR Singapore office experienced an increase in the number of corporate meetings being scheduled. The high volume of meetings highlighted a gap in ATR's audio capabilities, as the productivity of meetings suffered due to poor speech intelligibility and connection issues.

Solution

Sennheiser's TeamConnect Ceiling 2 was installed to capture audio during meetings and video conferences. The ceiling microphone ensured that meeting participants present in the office can be heard clearly by their colleagues who were dialing in remotely.
