

CUSTOMER SUCCESS STORY

Universidad Francisco Marroquín

Hybrid classes with touchless audio at Universidad Francisco Marroquín (UFM)

“TCC2 has completely revolutionized connectivity and communication in conferences, meeting rooms and virtual encounters.”

Fernando Falla, Managing Director FAREI

Challenge

Due to regulatory requirements during the COVID-19 pandemic, UFM had to reduce occupancy in its lecture halls and seminar rooms. For hybrid classes with on-site students and remote participants, the university needed to find a holistic audio solution to make the content accessible to all students.

Solution

UFM chose TeamConnect Ceiling 2 (TCC 2) to provide high-quality audio for 49 classrooms and faculty lecture halls. TeamConnect Ceiling 2 proved to be an ideal choice, as the ceiling microphone's innovative technology, such as automatic beamforming, delivers both: excellent sound reinforcement for in-room events in classrooms, lecture halls and meeting rooms as well as remote audio transmission. The completely touchless ceiling microphone also reduces the hygiene risk by 100%.
