

CUSTOMER SUCCESS STORY

Queen's University Belfast

Automated camera tracking for unparalleled learning experiences at Queen's University Belfast

Challenge

"Before the Pandemic, the university had the vision to see that we needed to update our teaching venues and a program was underway that would offer enhanced collaboration and lecture capture facilities", says Patrick Daly, Assistant Director for Learning and Teaching Support at Queen's University Belfast.

"When the Pandemic hit, we realized we needed to go further and turn our spaces into connected learning and collaboration venues that offer an inclusive experience to all our users across every setting."

Solution

The project team within the Learning & Teaching Support division of Information Services developed a concept to enable the capture of the entire teaching and learning experience within a classroom environment, allowing real-time participation and seamless bidirectional engagement between lecturers, in-class students and remote students. The subsequent pilot project covered the upgrade of seven teaching spaces, divided into small, medium and large categories. The spaces needed to create the best experience for remote and local learners and make sure that no student is disadvantaged due to location or when they access the learning content. The objective was to create a connected and flexible learning space where the academic and students can fully engage, whether in hybrid or face-to-face setting.

"As an academic, the technology is intuitive and permits those 'in the moment and spontaneous' creative teaching experiences."

Professor Gerry Gormley, MD FRCGP

FACTSHEET

Products installed	TeamConnect Ceiling 2
Country	United Kingdom
Region	EMEA
Industry	University
Integrator	Pure AV
Profile	Queen's University Belfast is one of the leading universities in the UK and Ireland. It is ranked 200 in the world (Times Higher Education World University Rankings 2021) and is a member of the Russell Group of UK research intensive universities, combining excellence in research and education with a student-centered ethos.
