

CUSTOMER SUCCESS STORY

Université Catholique de Lille

100% flexibility for persons with hearing loss at Université Catholique de Lille

Challenge

The accessibility project “Agenda d’accessibilité Programmée” called for a contemporary assistive listening approach at Université Catholique de Lille. The solution needed to be user-friendly and hygienic as well as easily scalable by using a centralized hardware solution.

Solution

Twenty units of MobileConnect were deployed. With the “Bring-Your-Own-Device” concept, the audio stream is sent directly to the students’ smartphones making it easily accessible and intuitive to use. Persons with hearing loss do not have to ask for a specific receiver device and can sit wherever the university’s WiFi is available.

“Sennheiser is an undisputed reference in sound reinforcement and audio recording equipment. We based our choice of MobileConnect on customer reviews, references from installations on the Sennheiser website as well as internal tests.”

Vianney Delory, Multimedia Manager at Université Catholique de Lille

FACTSHEET

Products installed	20 units of MobileConnect
Country	France
Region	EMEA
Industry	University
Profile	Founded in 1875, the Catholic University of Lille is a unique multidisciplinary institution in France that federates 5 Faculties, 20 Schools, Grandes Écoles and Institutes (EDHEC, IESEG, Junia, Icam, etc.), with more than 38,500 students in 300 training courses in 2022. The Catholic University of Lille also includes a hospital group (3 hospitals - 1,000 beds and places), 5 EHPADs and a Therapeutic Educational and Pedagogical Institute and 2 social innovation districts (850 beds and places). The largest private non-profit university in France, it is based on human and Christian values that have animated it since its inception. In close collaboration with its partners, it is an actor in the transitions of the contemporary world through its research projects, entrepreneurship, inclusion of the most vulnerable populations and energy and societal transition.
