

CUSTOMER SUCCESS STORY

Royal Society of Medicine

More than the standard:
Royal Society of Medicine goes the extra mile with MobileConnect

Challenge

Need for a high quality assistive listening system in a 300 seater auditorium – with an easy-to-install set up that doesn’t tamper with the existing infrastructure of the auditorium.

Solution

Sennheiser MobileConect was the recommended system. It is a completely flexible, easy-to-install system for assistive listening over Wifi. It works on the Bring Your Own Device (BYOD) concept and can be integrated in the existing wireless infrastructure.

“Being the RSM, we want to be more than just compliant with the Equality Act 2010, we want to show that we’re going the extra mile. By allowing delegates to use their own device, there is an immediate level of comfort for them that other systems can’t provide.”

Kevin McLoughlin, AV Manager RSM
